Integrated Assessment of Ecosystem Integrity of Large Northern Rivers:
The Northern River Basins Study Example

Guest Editor
Joseph M. Culp, Kevin J. Cash & Frederick J. Wrona

Integrated assessment of ecosystem integrity of large northern rivers: the Northern River Basins Study example
Joseph M. Culp, Kevin J. Cash, Frederick J. Wrona 1–5

The Northern River Basins Study: context and design
William D. Gummer, Kevin J. Cash, Frederick J. Wrona, Terry D. Prowse 7–16

Multiple-hydrologic stressors of a northern delta ecosystem
Terry D. Prowse, F. Malcolm Conly 17–26

Dissolved oxygen decline in ice-covered rivers of northern Alberta and its effects on aquatic biota
Patricia A. Chambers, Scott Brown, Joseph M. Culp, Richard B. Lowell, Alain Pietroniro 27–38

Contaminant sources, distribution and fate in the Athabasca, Peace and Slave River Basins, Canada
Frederick J. Wrona, John Carey, Brian Brownlee, Ed McCauley 39–51

Nutrient enrichment of northern rivers in response to pulp mill and municipal discharges
Patricia A. Chambers, Alec R. Dale, Garry J. Scrimgeour, Max L. Bothwell 53–66

Interactive effects of nutrients and contaminants from pulp mill effluents on riverine benthos
Joseph M. Culp, Cheryl L. Podemski, Kevin J. Cash 67–75

Fish health in the Peace, Athabasca and Slave river systems
Kevin J. Cash, Wade N. Gibbons, Kelly R. Munkittrick, Scott B. Brown, John Carey 77–86

Cumulative effects assessment for the Northern River Basins Study
Joseph M. Culp, Kevin J. Cash, Frederick J. Wrona 87–94

Volume 8 No. 2 December 2000

The effects of toxicants on planktonic systems: an integrated approach using the analysis of size distributions
Robert M. Baca, Stephen T. Threlkeld 95–105

Sediment quality of North Carolina estuaries: an integrative assessment of sediment contamination, toxicity, and condition of benthic fauna
J.L. Hyland, W.L. Balthis, C.T. Hackney, M. Posey 107–124

Recolonization and possible recovery of Burrowing Mayflies (Ephemeroptera: Ephemeridae: *Hexagenia* spp.) in Lake Erie of the Laurentian Great Lakes
Don W. Schloesser, Kenneth A. Krieger, Jan J. H. Ciborowski, Lynda D. Corkum 125–141

Effects of wastewater on fish health: an integrated approach to biomarker responses in brown trout (*Salmo trutta* L.)
Daniel Bernet, Heike Schmidt-Posthaus, Thomas Wahli, Patricia Burkhardt-Holm 143–151

Announcement: Brief communications/Research notes 153

Research note

The effects of carp (*Cyprinus carpio* L.) on sediment export from a small urban impoundment
D.R. Barton, N. Kelton, R.I. Eedy 155–159

Volume 8 Nos. 3–4 2001

VALIMAR – VALIdation of bioMARkers for the
Assessment of Small Stream Pollution

Guest Editor
Rita Triebskorn & Heinz-R. Köhler

Preface
Rita Triebskorn, Heinz-R. Köhler v–vi

The project VALIMAR (VALIdation of bioMARkers for the assessment of small stream pollution): objectives, experimental design, summary of results, and recommendations for the application of biomarkers in risk assessment
Rita Triebskorn, Jürgen Böhmer, Thomas Braunbeck, Wolfgang Honnen, Heinz-R. Köhler, Reinhold Lehmann, Axel Oberemm, Julia Schwaiger, Helmut Segner, Gerrit Schüürmann, Walter Traunspurger 161–178

Physicochemical and morphological characterization of two small polluted streams in southwest Germany
Stefan Adam, Michael Pawert, Reinhold Lehmann, Barbara Roth, Ewald Müller, Rita Triebskorn 179–194

Chemical analyses of water, sediment and biota in two small streams in southwest Germany
Wolfgang Honnen, Karin Rath, Thomas Schlegel, Angela Schwinger, Dietrich Frahne 195–213

Steroid analysis and xenosteroid potentials in two small streams in southwest Germany
Wolfgang Körner, Ulrike Bolz, Rita Triebskorn, Julia Schwaiger, Rolf-Dieter Negele, Alexander Marx, Hanspaul Hagenmaier 215–229

Histopathological alterations and parasite infection in fish: indicators of multiple stress factors
Julia Schwaiger 231–240

Ultrastructural biomarkers as tools to characterize the health status of fish in contaminated streams
Maike Gernhöfer, Michael Pawert, Michael Schramm, Ewald Müller, Rita Triebskorn 241–260

The hepatic stress protein (hsp70) response to interacting abiotic parameters in fish exposed to various levels of pollution
Heinz-R. Köhler, Cornelia Bartussek, Helga Eckwert, Katrin Farian, Stefan Gränzer, Thomas Knigge, Nicole Kunz 261–279

Hepatic biotransformation enzymes of fish exposed to non-point source pollution in small streams
Anja Behrens, Helmut Segner 281–297

Alterations of selected metabolic enzymes in fish following long-term exposure to contaminated streams
Jens Konradt, Thomas Braunbeck 299–318

Chemometric discrimination between streams based on chemical, limnological and biological data taken from freshwater fishes and their interrelationships
Uwe Dietze, Thomas Braunbeck, Wolfgang Honnen, Heinz-R. Köhler, Julia Schwaiger, Helmut Segner, Rita Triebskorn, Gerrit Schüürmann 319–336

Assessment of water and sediment contamination in small streams by means of cytological and biochemical alterations in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes
Thomas Braunbeck, Marija Strmac 337–354

Fish early life stage tests as a tool to assess embryotoxic potentials in small streams
Till Luckenbach, Maja Kilian, Rita Triebskorn, Axel Oberemm 355–370

Using indicators of fish health at multiple levels of biological organization to assess effects of stream pollution in southwest Germany
Simonetta Siligato, Jürgen Böhmer 371–386

The meiofauna community of two small German streams as indicator of pollution
Stefanie Beier, Walter Traunspurger 387–405

Macrozoobenthos communities and biocoenotic assessment of ecological status in relation to degree of human impact in small streams in southwest Germany
Jürgen Böhmer, Armin Zenker, Barbara Ackermann, Berthold Kappus 407–419

Author index 421

Volume contents 423–425
